

UMESH JOSHI

Full Stack Developer

Rohini, Delhi • +91-7428418914 • umeshjoshi.dev@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFILE SUMMARY

Frontend Developer with 1+ years of hands-on experience building production web applications using React.js, TypeScript, Node.js, Express, and Prisma. At Booming Bulls, built the platform's client and admin websites, contributing across the stack as the team grew. Strong foundation in responsive design, component-driven architecture, and full-stack development, with a focus on owning features end-to-end — from UI to backend APIs. Proficient across the full software development lifecycle, from requirements to deployment, using modern frameworks and best practices to deliver reliable, scalable solutions. Always looking to sharpen skills and take on more ownership.

EXPERIENCE

Frontend Developer | Booming Bulls

May 2025 – Jul 2026

Built the platform's client, admin, and trading products across the stack

- **Forex/CFD Trading Platform (MetaTrader 5):** Worked full-stack across the platform, building Next.js frontends (client portal, trading terminal, back-office admin, partner portal) and Node.js/Express microservices (Prisma, PostgreSQL, Redis) deployed on GKE.
- **Payments:** Built a stateless payment-gateway adapter service (NestJS) enabling plug-and-play provider integrations; shipped SWRPay UPI deposits end-to-end and redesigned crypto deposit/withdrawal flows with live status polling, OTP verification, and KYC gating.
- **Backend Refactor:** Refactored a monolithic ~10k-line back-office backend into 25+ modular route/controller modules (bootstrap file cut to ~480 lines), added Redis caching on hot lookups, and resolved a recurring production issue affecting reliability.
- **superior.com:** Built the main marketing website, working closely with design to ship a polished, production-ready interface.
- **dashboard.superior.com (CRM):** Built the login/signup flow and OTP verification screens and improved their UX; developed the deposit flow, KYC flow, transactions section, and settings pages; integrated Cloudflare Turnstile across login, signup, and OTP screens for bot protection.
- **trade.superior.com (Trading Terminal):** Improved the UI and helped maintain efficient use of the WebSocket and MetaTrader WebSocket APIs powering live trading.
- **Analytics:** Set up Microsoft Clarity and Google Analytics (GA4) across the landing website, CRM dashboard, partner/IB portal, and trading portal.

Full-Stack Developer Intern | Unified Mentor

Oct 2024 – Dec 2024

- Developed dynamic and responsive web applications, including Clinic Management and Hospital Management websites.
- Built and deployed smaller applications such as an Expense Tracker, Portfolio Website, and Tic Tac Toe game.
- Worked with HTML, CSS, JavaScript, and React to create interactive and user-friendly front-end experiences.
- Integrated Firebase for authentication, database management, and hosting solutions.
- Collaborated with the team to enhance UI/UX and optimize performance for better efficiency.

Front End Developer Intern | CoForce Learning Academy

Jan 2025 – Feb 2025

- Developed a gym booking application to streamline scheduling and improve user experience.
- Designed and implemented RESTful APIs using Node.js and Express.js for seamless frontend-backend communication.
- Integrated MongoDB to efficiently manage user profiles, gym schedules, and bookings.
- Built the frontend using React.js, enhancing the UI/UX for an intuitive booking system.
- Implemented user authentication with JWT for secure login and access control.

PROJECTS

Emotion Music Recommendation | [Repo](#) | Python, Keras, TensorFlow, Flask, Spotipy

May 2023

- Built a real-time emotion recognition app using a model trained on the FER 2013 dataset to detect emotions from live webcam feeds.
- Integrated the Spotify API to recommend personalized playlists basex'd on the detected emotion.

- Designed a neumorphic UI for an engaging, user-friendly experience; deployed with Flask, including a video streaming module.

Personal Portfolio Website | [Live Site](#) | [Repo](#) | *HTML, CSS, JavaScript, React, TypeScript*

May 2024

- Built a fully responsive portfolio site with a project showcase, contact form, and smooth navigation.
- Deployed via Netlify with CI/CD for seamless updates.

Sneakers E-Commerce Website | [Live Site](#) | [Repo](#) | *HTML, CSS, JavaScript*

Aug 2024

- Developed a mobile-first e-commerce site with dynamic product display, filtering, and an interactive cart system.
- Deployed on GitHub Pages for easy access and visibility.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React.js, Next.js (App Router), Redux, Redux Toolkit, TanStack Query, GSAP, Three.js, Tailwind CSS, shadcn/ui, Material UI, HTML5, CSS3

Backend: Node.js, Express.js, NestJS, Python, Socket.io, Prisma

Databases & Caching: PostgreSQL, MongoDB (Local & Atlas), Supabase, Redis

Infrastructure & Cloud: Docker, Google Kubernetes Engine (GKE), AWS, Microsoft Azure, Vercel

Tools: Git, GitHub, VS Code, Figma, Canva

EDUCATION

Bachelor of Technology in Computer Science | [Maharshi Dayanand University](#)

Oct 2020 – May 2024

Relevant Coursework: Data Structures, Algorithms Analysis, Software Methodology, Database Management, Artificial Intelligence, Internet Technology, Systems Programming, Computer Architecture

Higher Secondary Education – CBSE | [BVM Model Sr. Sec. School](#)

July 2018 – July 2020

CERTIFICATIONS

- Full-Stack Web Development — Unified Mentor (Oct 2024)
- Data Structures and Algorithms — Scrimba (2026)
- Learn JavaScript — Scrimba (2026)
